

Corporate Profile

History

CRIBWARE was introduced in 1984, in an Iowa machine shop, as one of the first computer-based tool management systems to control, track and manage tools. Over the past two decades, we have introduced many new crib management concepts: kitting, automatic storage and retrieval systems, multi bin/multi location, shelf life, and document viewing. The system is modular, permitting customers to build upon and add functionality, as needed.

Today, CRIBWARE systems are managing material in a diverse group of industries: aerospace, automotive, consumer goods, contract manufacturing, defense, chemical and petroleum refineries, foundries, industrial machinery, job shops and industrial distribution. Some familiar names include General Motors, Eaton, Babcock and Wilcox, U.S. Navy, U.S. Army, Siemens, NASA, Chrysler, ExxonMobil, Ford Motor Company, Toro, Honda Corporation and Parker Hannifin.

Training assures success

We are just as proud of our installations at small and medium sized companies, and pride ourselves in fitting the solution to your specific needs.

We use state-of-the art development tools supported by excellent working relationships with industry leading vendors to ensure quality solutions and services that contribute to the success of our customers. All of our clients, large and small, enjoy our long standing reputation for incredible service and support. Our emphasis is to help you become more efficient and maintain that efficiency.

Staff

The Applied CIM Technologies' staff brings years of practical tool crib management experience, high energy and innovation to its products and services. This staff of computer system engineers, software developers, technicians and trainers, responds quickly to customer needs and the unique requirements of our industry.

Commitment

Applied CIM Technologies, Inc. is committed to providing quality solutions and services that contribute to the success of its customers. Quality products, service, and support are the backbone of any long-term customer relationship. Applied CIM Technologies' systems, support, and service programs were developed and enhanced to help both small and large organizations become more efficient and maintain this efficiency over the long term.
