

Kardex System Interface

The Kardex, Industrier Vertical Lift, automatic storage and retrieval units will be closely integrated to your other corporate systems by utilizing the Kardex module.

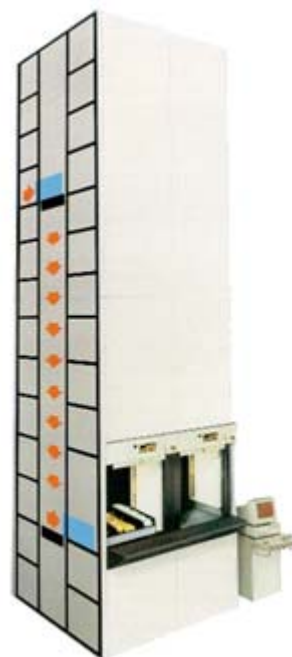

The functions supplied include inventory control of the unit's contents, tracking of item history and usage, automatic reordering of items dispensed, and interfacing to other corporate systems.

The Kardex units may be daisy-chained together or networked to other storage locations and monitored remotely by the CRIBWARE system.

Features

The CRIBWARE system provides a real-time interface to your automatic storage and retrieval system. Utilizing database and machine communication technology, CRIBWARE provides the following features:

- Quick check out/check in of individual items and kits
- Inventory management of the Kardex contents
- Control of Kardex units from within CRIBWARE
- Standard CRIBWARE operator interface
- Tracking of item history and usage
- Automatic reordering of items dispensed
- Interfacing to other corporate systems
- Secure control of tooling inventory
- Management of multiple Kardex units and types
- Real-time information on inventory levels
- Multiple Kardex unit management, multiple storage location management
- Corporate wide purchasing
- Network connections to other corporate systems
- Monitoring by remote CRIBWARE station for activity and usage
- Set up and planning of Kardex items from another CRIBWARE station
- Real-time reporting
- Integration with other CRIBWARE functions i.e., gage calibration, presetting, CAD/CAM.

Features & Benefits

Feature:

Real-time Inventory Control

Tracking and Location

Automatic Reordering

Check Out and Check In Tracking Parameter Entry

Advanced Reports

Multiple AS/RS Units

Remote Planning Stations

Benefit:

- Prevents shortages
- Set minimum/maximum quantity levels
- Automatic inventory adjustments
- Reduces excess inventory
- Real-time item location
- Traceable assignment and usage
- Usage history
- System generated, order point driven purchasing
- Avoid costly stock-outs
- Requisitions or purchase orders
- Reorder reports
- Fax or modem electronic ordering options
- Quick and accurate check out and check in
- Reduces time loss acquiring items
- Complete accounting of tooling consumption
- Bar code data entry option
- Accurate management reports
- Improves accountability
- Provides cost accounting analysis
- Common reports available include: inventory valuation, usage history, where used, obsolete tool reorder, change reorder to restock
- Serial connection
- Daisy chaining
- Local area network integration
- Item entry and set up
- Create job and material requirements lists
- Run reports and listings
- Manage total organization inventory with additional linked CRIBWARE stations
