

# Replenishment

#### Overview

CRIBWARE Replenishment permits the creation of purchase requisitions and/or purchase orders for the ordering and replenishment of material. The CRIBWARE Purchasing module automates many routine purchasing tasks, eliminates redundant tasks, and increases purchasing efficiency. It increases order fulfillment accuracy and eliminates untracked or sporadic buying habits. The purchasing and receiving functions can be customized and automated by each department.

### **Benefits**

- Lowers the cost of purchasing administration
- Reduces purchasing errors
- Reduces or eliminates paperwork
- Replenishment based on actual usage
- Integrated purchasing and receiving
- Level of automation may be configured by the various users
- Facilitates item standardization and vendor reduction
- Accurately tracks vendor history
- Reduces expedited shipments
- Reliable and scalable
- Secure and accessible through your computer networks

### Purchasing/Receiving Activities

There are nine different Purchase Order activities:

- 1. Creating Purchase Orders
- 2. Canceling Purchase Orders
- 3. Un-canceling Purchase Orders
- 4. Add and Edit Purchase Order Items
- 5. Removing Items from Purchase Order
- 6. Receiving Purchase Orders
- 7. Un-receiving Purchase Orders
- 8. Printing, Emailing, and Faxing Orders
- 9. EDI Transmission of Purchase Orders

## Replenishment

#### Features

- Handles both requisitions and purchase orders
- Converts requisitions to purchase orders
- Order point and max point replenishment
- Configurable filters to customize replenishment equations
- Multiple vendors per item
- Prefix and suffix numbering for requisitions and purchase orders
- Print, fax, or email purchase orders
- P.O. by point-of-use location or by facility
- Remote and local receiving
- Replenishes serialized, date sensitive, and reworked material
